# PYR-125-25

Get more from your 5 axis machine

Assembled with 3x 48155-125 Makro•Grip vices

- Clamp multiple parts with full accessibility
- Utilises Makro Grip clamping & proven stamping process
- Highest holding power from lowest clamping force
- Multiple clamping means less tool changes and longer cycle times
- Compatible with all LANG vices up to 160mm jaw opening

CAD Files Available

Tel: 01296 796576

Web: [www.lang-technik.co.uk](http://www.lang-technik.co.uk)

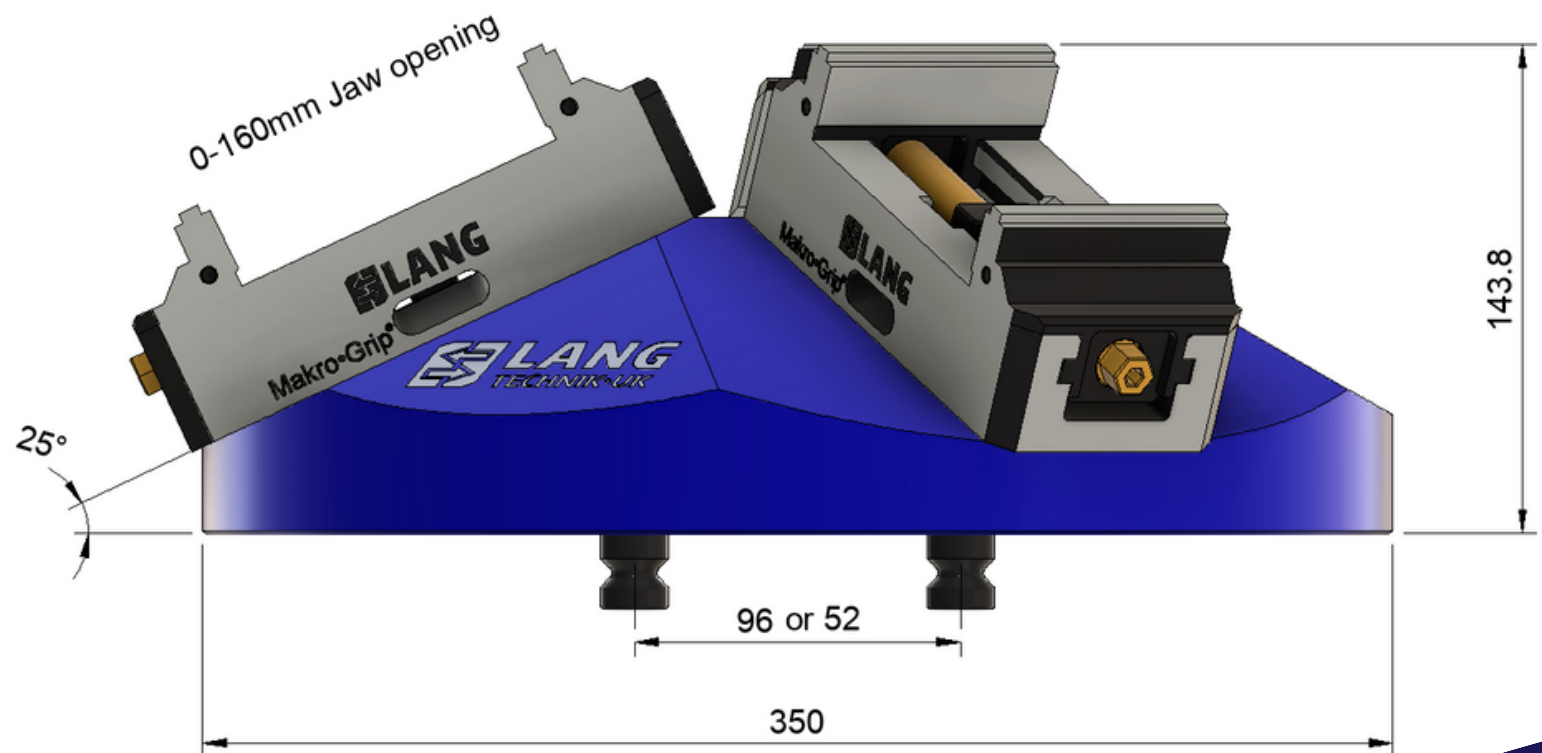

# PYR-77-25

Get more from your 5 axis machine

Assembled with 3x 48160-77 Makro•Grip vices

- Clamp multiple parts with full accessibility
- Utilises Makro Grip clamping & proven stamping process
- Highest holding power from lowest clamping force
- Multiple clamping means less tool changes and longer cycle times
- Compatible with all LANG vices up to 160mm jaw opening

CAD Files Available

Tel: 01296 796576

# PYR-96C-25

Get more from your 5 axis machine

Assembled with 3x 45480 Combo Quick•Point plates

- Clamp multiple parts with full accessibility
- Utilises combination Quick•Point plates for ultimate flexibility
- Compatible with all LANG vices up to 160mm jaw opening
- Multiple clamping means less tool changes and longer cycle times

Takes all Makro•Grip vices  
up to 160mm jaw opening

CAD Files Available

Tel: 01296 796576

Web: [www.lang-technik.co.uk](http://www.lang-technik.co.uk)

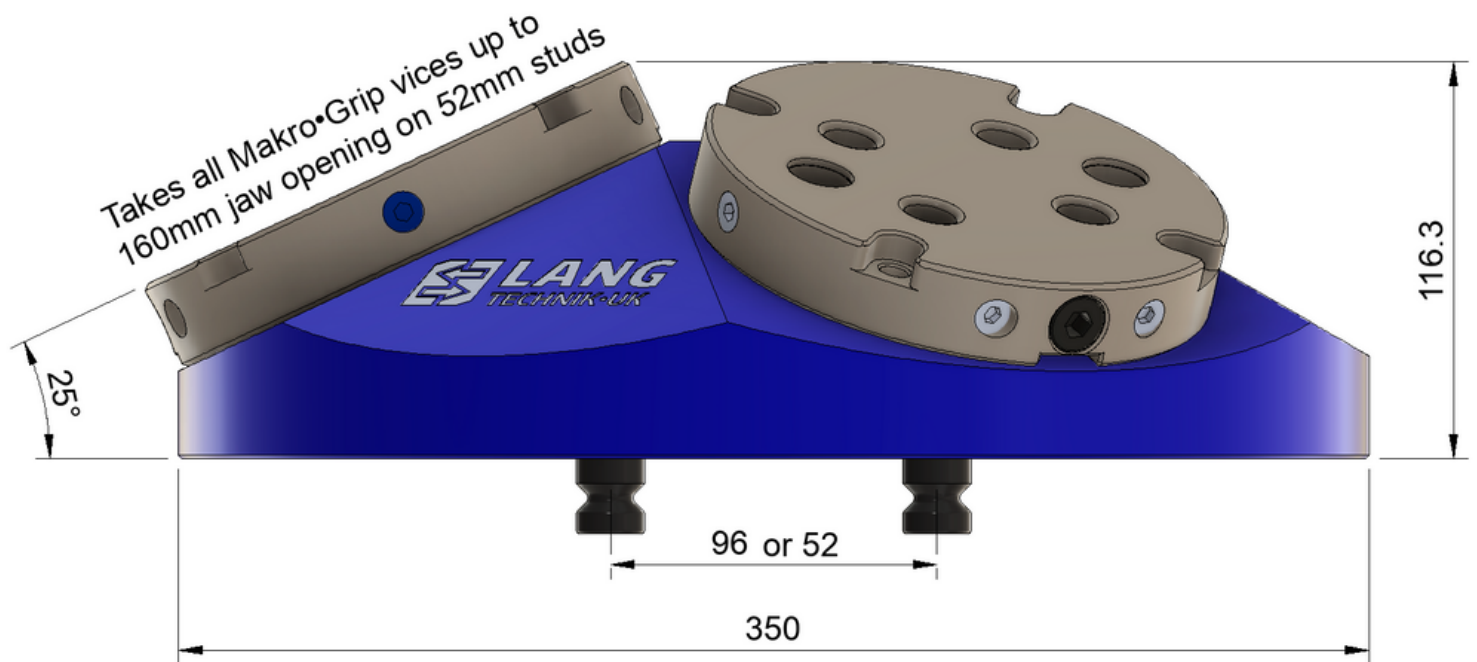

# PYR-52-25

Get more from your 5 axis machine

Assembled with 3x 45900 Quick•Point plates

- Clamp multiple parts with full accessibility
- Utilises 52mm Quick•Point plates
- Compatible with all LANG vices up to 160mm jaw opening on a 52 stud
- Multiple clamping means less tool changes and longer cycle times

CAD Files Available

Tel: 01296 796576

Web: [www.lang-technik.co.uk](http://www.lang-technik.co.uk)

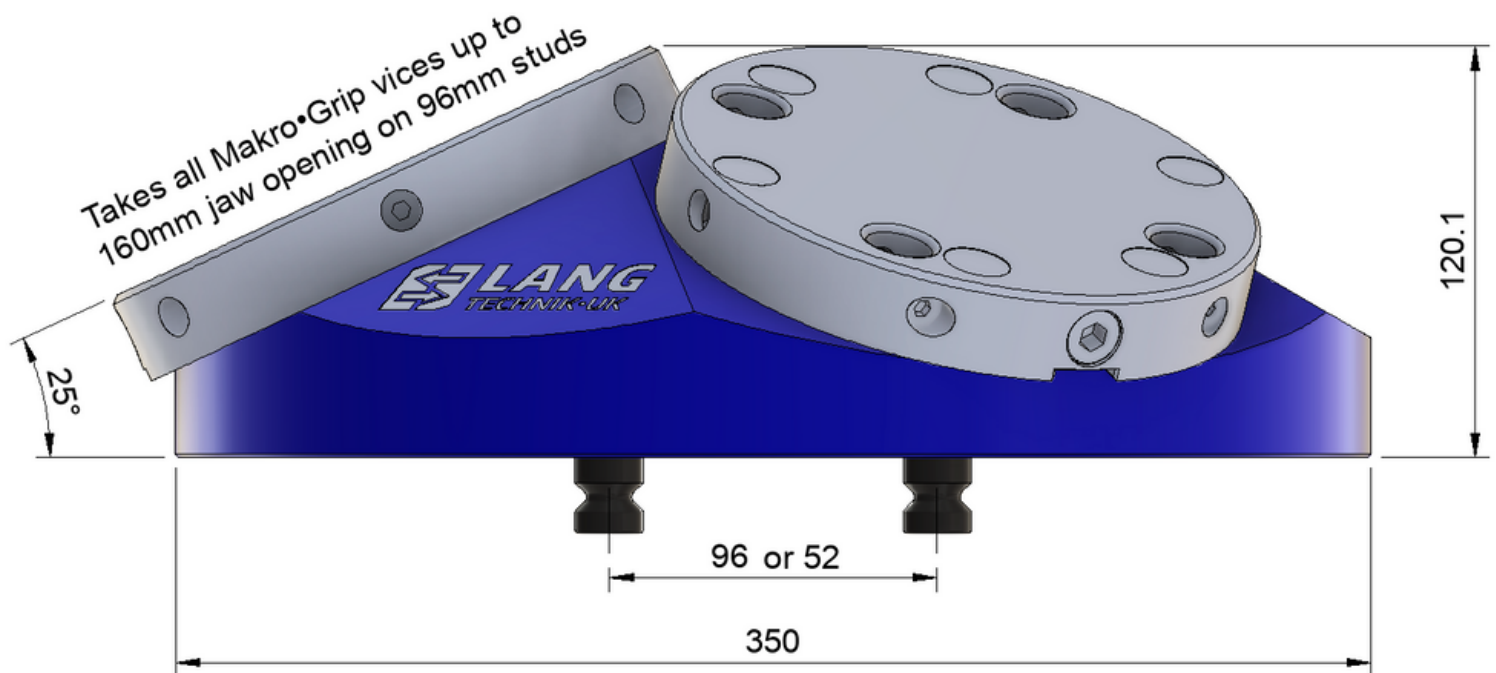

# PYR-96-25

Get more from your 5 axis machine

Assembled with 3x 45800 Quick•Point plates

- Clamp multiple parts with full accessibility
- Utilises 96mm Quick•Point plates
- Compatible with all LANG vices up to 160mm jaw opening on a 96 stud
- Multiple clamping means less tool changes and longer cycle times

CAD Files Available

Tel: 01296 796576

Web: [www.lang-technik.co.uk](http://www.lang-technik.co.uk)

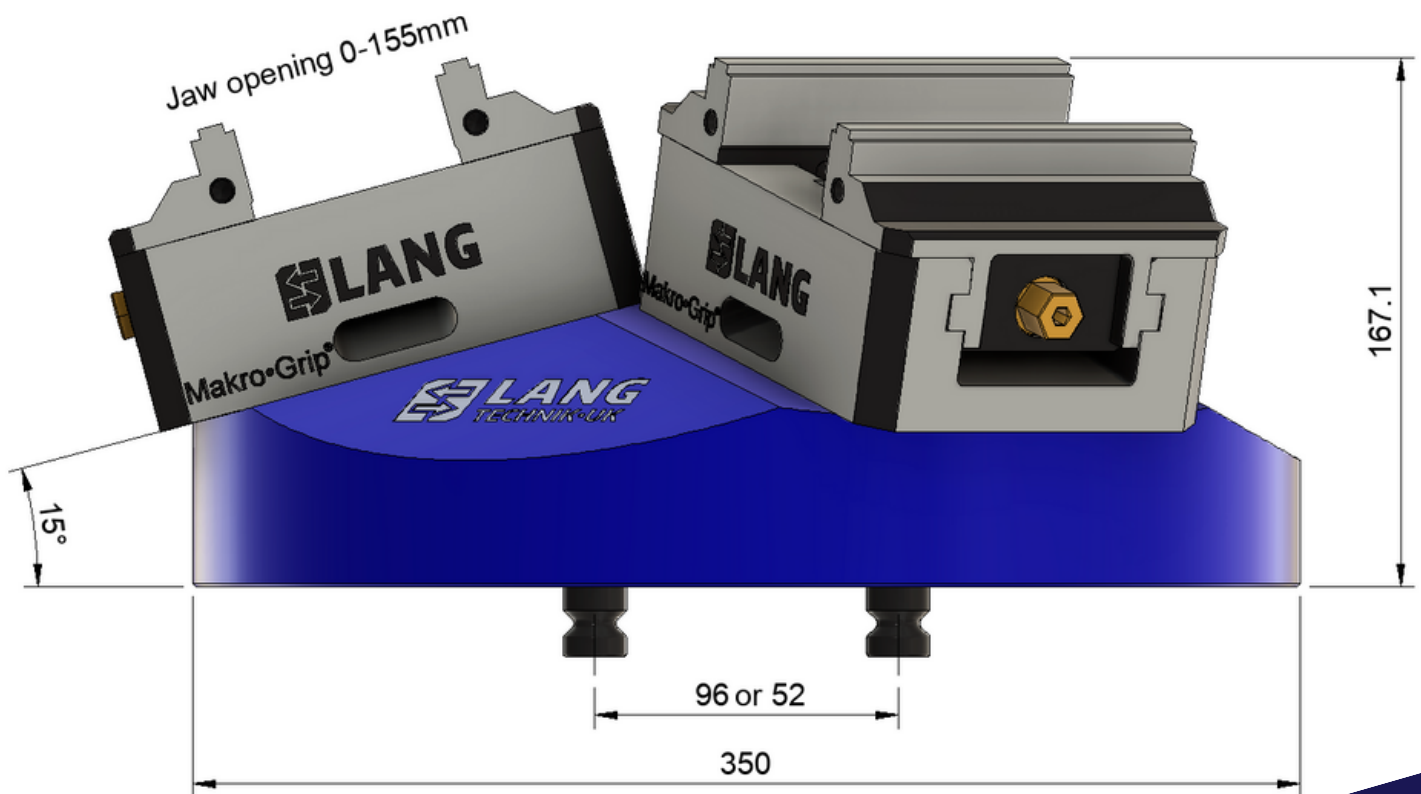

# PYR-125-15

Get more from your 5 axis machine

Assembled with 3x 48155-125 Makro•Grip vices

- Clamp multiple parts with full accessibility
- Utilises Makro Grip clamping & proven stamping process
- Highest holding power from lowest clamping force
- Multiple clamping means less tool changes and longer cycle times
- Compatible with all LANG vices up to 160mm jaw opening

CAD Files Available

# PYR-230

Get more from your 5 axis machine

For smaller machines and pallet loaders

- Clamp multiple parts with full accessibility
- Utilises Makro Grip clamping & proven stamping process
- Highest holding power from lowest clamping force
- Multiple clamping means less tool changes and longer cycle times
- Compatible with all LANG vices up to 85mm jaw opening

CAD Files Available

Tel: 01296 796576

Web: [www.lang-technik.co.uk](http://www.lang-technik.co.uk)

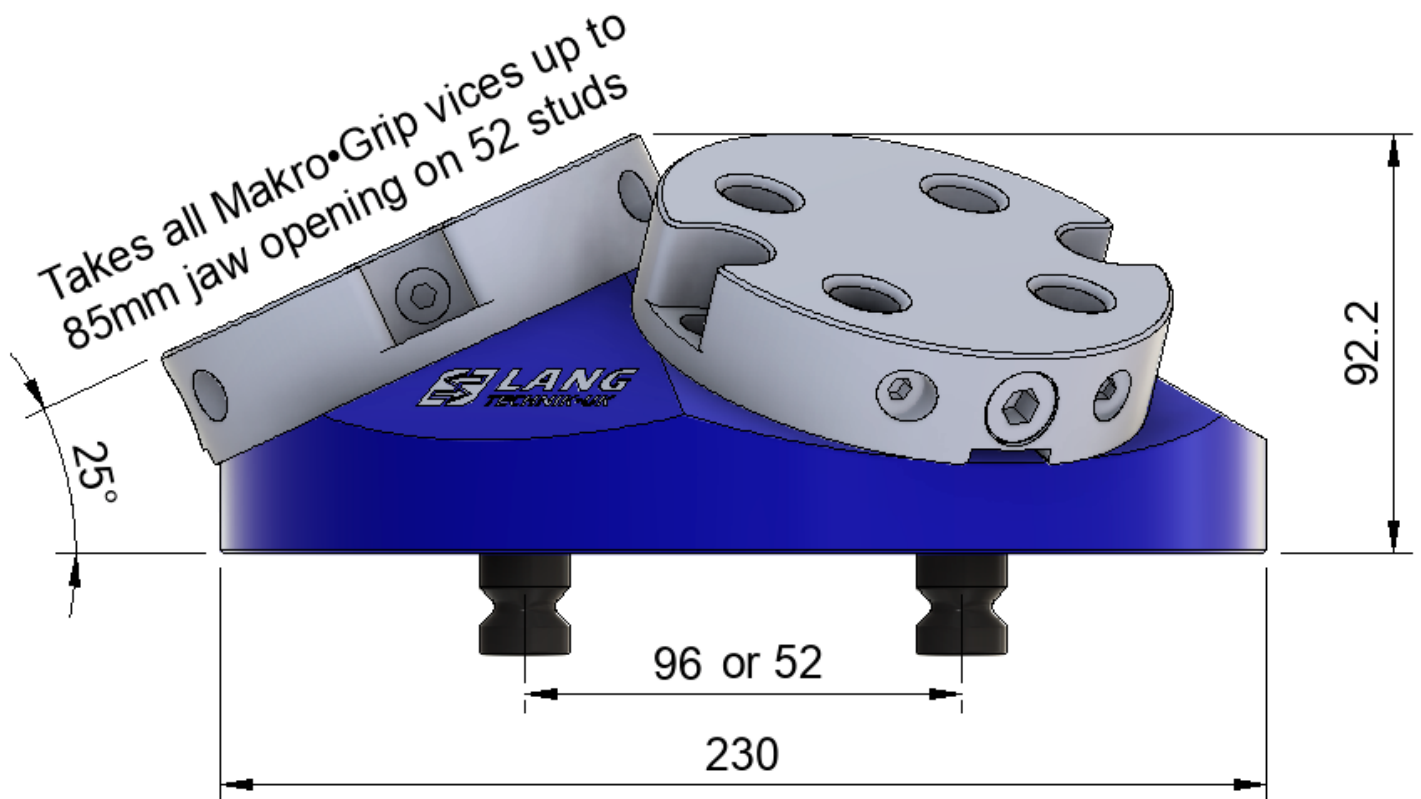

# PYR-230-52

Get more from your 5 axis machine

For smaller machines and pallet loaders

- Clamp multiple parts with full accessibility
- Utilises Quic•Point 52 plates for flexible changeovers
- Multiple clamping means less tool changes and longer cycle times
- Compatible with all LANG vices up to 85mm jaw opening on a 52 stud pattern
